

## EXPERIENCE

---

### Software Engineer Intern @ Odoo

On-site, Belgium

 Javascript Python

 Oct 2024 - Jan 2025

- Enhanced the Odoo Website Builder by implementing new features that improved user satisfaction, serving over **12 million users** globally.
- Implemented **e2e and integration testing** test that eliminated critical bugs, resulting in a **30% decrease** in reported issues during development.
- Used JavaScript and Python to develop scalable solutions, contributing to the recognition of the project as the most widely used **open source** website builder.

### Mobile Developer @ Syeew

Remote, Italy

 Dart Flutter

 March 2025 - May 2025

- Led the development of the core product of the company, a mobile application for a **Data Analysis** for iOS and Android using Flutter with BloC pattern.
- Implemented a custom **data visualization** system for non-technical users, improving significantly data awareness and decision-making processes.
- Collaborated with the design team to create a user-friendly interface, leading to a **20% increase** in user retention.

### Mobile Developer Freelance

Remote, Italy

 Dart Flutter

 Oct 2023 - Present

- Developed performance-oriented **cross-platform** mobile applications for iOS and Android using Flutter.
- Integrated REST APIs and established a structured mobile application architecture using **BLoC/Cubit** pattern, leading to a **40% reduction** in development time.
- Collaborated with clients to gather requirements and deliver customized solutions, achieving a **100% client satisfaction rate**.

## EDUCATION

---

### Bachelor of Computer Science

University Of Camerino

 3.4/4.0 GPA

 Sept 2022 - Sept 2025

- Main Courses: Software Engineer, Web-Mobile and Cloud Applications, Algorithm and Data Structure, OOP.

## PROJECTS

---

### Ygital Cure

[ Site ]

 Dart Flutter

- Developed a full-scale **salon management application** with over **10,000 active users**, implementing robust architecture using BLoC pattern.
- Designed and implemented a scalable **multi-tenant architecture** that enabled tiered subscription plans, increasing platform revenue by **35%** through premium feature offerings to over 100 salon businesses.
- Built core business features such as appointment scheduling, POS, and client relationship tools that increased average revenue per salon owner by **30%** while reducing operating costs.

### Sossoldi

[ Github link ] [ Site ]

 Dart Flutter Sqlite

- Contributed to Sossoldi, an **open source** net worth tracking app collaborating with a community led by a prominent Italian content creator.
- Implemented critical features for the **v1.0 release**, including an interactive onboarding, transactions history and reconciliation.
- Led collaborative development efforts with a team of **30+ contributors** to deliver a high-quality product.
